

The team of KV RETENT solves complex technical challenges for high standards in medical facilities, laboratories, schools, re-search institutions and industry.

The team of KV RETENT solves complex technical challenges for high standards in medical facilities, laboratories, schools, research institutions and industry. Koit Pindmaa, one of the founders of the Icelandic company, began in 1993 with the importation of tools for dentistry.

In 1995 the company expanded its activities to the manufacture of dental clinics furniture. The number of employees rose to seven. The clientele of RETENT has expanded to pharmacies, hospitals and a number of laboratories.

In 1999, RETENT engaged 20 employees. Because of sale by public tender for laboratory furniture RETENT got the chance to produce 200 different laboratories.

The ISO 9001:2000 certification was in 2001.

The references include schools equipped with furniture and fittings for natural history, chemistry and physics and other classrooms. Meanwhile RETENT employs nearly 40 staff members. The latest project is the fabric of the production in Nõo. With the aim of the production capacity and quality continue to improve the company has purchased the imos CAD/CAM-software and an CNC-machining of the Homag Group.
